

Ashbury

Fantastic New Range of Acoustic and Electro-Acoustic Guitars from Gremlin Music Available Now!

We spent a long time searching for the right factory to produce these very understated, high quality guitars. We settled on a great little Boutique factory in Vietnam, as we felt they could offer us something out of the ordinary. We sent experienced luthier Phil Davidson (well respected for high quality guitars, banjos and mandolins) out to the factory while the first delivery of guitars was being crafted, to inspect the quality control. Phil's feedback was 100% positive, and he was very impressed with the skill and the knowledge of the makers of these guitars. In turn, we are extremely impressed with the results, and we know you will be too.

Rathlin Series

The Rathlins all have a solid Spruce top, with a Mahogany body and Indian Rosewood binding and fingerboard. The range is made up of dreadnought, auditorium, OOO and OOO with cut-away models, and all are available as acoustics, or fitted with the Headway Snake 3 under-saddle active pickup.

Lindisfarne Series

The Lindisfarne Cedar Series Guitars have a solid Western Cedar Wood top, solid Rosecherry body, and Ivorywood binding. They all come equipped with one of the new Headway SA-1 Pickups. The Lindisfarne guitars each come with a superb quality and very attractive mahogany faced wooden case. This range is made up of dreadnought, OOO, OOO with cutaway, and auditorium models.

Lindisfarne Black

The Lindisfarne Black shares its specs with the Lindisfarne Cedar Guitars, the main differences being a solid Sitka Spruce top and curly maple binding. Like the others, it comes with the SA-1 Pickup and wooden case.

The Lindisfarne guitars come complete with this beautiful wooden case. It is also available to buy, in OOO size and dreadnought size.
